

Express Lifts Ltd - A Renowned synonym of Elevators

Vasant Detroja & Bhupat Khunt Founder and Chairman of Express Company in 1995, joined hands and took the level journey of Friendship one level above by establishing a Limited company named Express Lifts Ltd. Engineers by profession with very dynamic personality, they are fully committed to standards of excellence, they see "Express" as reaching sky heights matching global standards. They possess a vast experience in managerial & technical skills & believe in making right decision at the right time. Since the very beginning, the duo shared an innovative spirit and distinct spark of excellence which would later become the hallmark of the company and spearhead it to market leadership.

The Company has experience of 25+ years in the Elevator Industry and having more than 25 branches all over India as well offices set up in Bahrain, Saudi Arabia & Oman. Express offers complete elevator system solutions for Government, Public, Private and Corporate sectors. Their equipment's are installed in several national and multinational organizations that includes Pharmaceutical Companies, Government & Semi-Government Projects, high rise buildings, prominent real estate companies, small, medium and large scale industries, Star rated hotels and have expanded exports in countries like Nepal, Dubai, Kenya, Sri Lanka & Seychelles.

Express Elevators has a massive factory set up of 20,000 Sq. yards with manufacturing capacity of 5000 elevators per annum

which is situated at Ahmedabad with latest manufacturing equipments & technology of Germany, Japan, Turkey & USA. We at Express Lifts Ltd. are always on look out to give a better edge to our customers, we own Laser Machine of DNE Bystronic & CNC - Punching Machine Amada - Japan, which joins the wagon of CNC machines. Many of our components are procured from Spain, China, Turkey, Japan, Germany, USA. We believe to give our customers an Indian designed product with International quality," says Vasant Detroja.

Express Lifts Ltd offers a vast range of functional and visually appealing designs created by its design professionals and using innovative materials and accessories. Express Elevators are distinguishable in operations and have a unique car structure.

The Company is doing extravagant growth in Elevator sector and has remarked its name in India's Top 10 companies of Elevators. We are an ISO 9001:2008, ISO 14001:2015 & ISO 22000 Company which provides facilities of design, manufacturing, sales, installation & maintenance. One of their unique selling points is that they are specialized in customized elevators. They provide solutions that suits their clients' requirement and preferences. They offer energy efficient elevator with a lower electricity consumption that reduces operating cost of the elevator and minimize the environmental impact.

Their equipments offers safety, reliability and high performance standards and are developed from original technical processes.

Being aware of the challenge involved in the increasing competitiveness of Elevator sector, which requires personalized service and flexibility they have available and are developing day by day new devices, functions and methods in accordance with their policy. And continually improving the performance of their product, giving simple solutions to complex problems.

While the current covid-19 pandemic has put a damper on Elevator sectors even though in this tough situation, the company has been quick to respond to market requirements for greater hygiene control and is now offering several choices to address these needs. They have come out with Elevators models

Technologies that Elevate lifestyle, Latest Manufacturing Facilities

featuring touchless operations where you can use your mobile phones to operate elevators without touching the buttons and with their smart controllers ex-cloud you can monitor elevator functions online.

The company is offering complete range of Elevators

- Passenger Elevator (Traction / MRL)
- Capsule Elevator
- Hospital Elevator
- Goods Elevator
- Dumbwaiter Elevator
- Hydraulic Elevator
- Pneumatic Elevator
- Home Elevator
- Car Stacker Parking
- Escalator

Very few companies in India have the techno-abilities and personnel expertise to manufacture and install Hydraulic Elevators. Most of the companies are install-

ing Hydraulic Elevators only up to 3-storey level. A few selected companies can manufacture and install Hydraulic Elevators up to 6-storey level. Among them, Express Lifts Ltd is India's market leader, with 65% market share.

In general, one can get whatever one's project demands with wide range of special purpose elevators which provides Safety, quality, sustainability and this is at cost-effective ranges. A custom-tailored solution as well as service and technical follow-up bring the adage "Customer is king" to life.

"Our greatest asset is the expertise and the resourceful of our people - our armada of Sales and Technical personnel. We also offer many years of experience executing and managing intensive installations," says Vasant

Detroja.

If that's not not all, founders Vasant Detroja and Bhupat Khunt makes a point to keep up with the trends by participating in various exhibitions across the globe. They also take their corporate social responsibility seriously by organising such events as blood donation camps with the Indian Red Cross Society. Along with they also give training of Elevator technology in various institutes.

However, their most unique event was the recent "Vision Launch 2020", in which they promoted their goal of making Express Elevators Ltd. one of India's top company by 2025, and outlined new products and services.

Impressive array of Industrial Valves

There is no major industrial valve that Himanshu Panchal's Hina Industries does not produce

Himanshu Panchal

With a solid foundation in technology and years of experience, Himanshu Panchal leads from the front in commitment and trust. This is probably why his company Hina Industries has been going strong since 1974 and continues to deliver reliable and quality products that meet customer expectations.

Since its inception, Hina Industries has focused on the manufacture and sales of all kinds of Industrial Valves. Over the years, it has acquired prestigious international certifications and approvals from major Oil and Pharmaceutical companies.

"With more than 40 years of development, we have put in much effort and sweat to develop Hina Industries into a leading industrial valve manufacturer in India," says a proud Himanshu, who plays the dual role of Chairman and CEO.

SINCE 1974
HINA INDUSTRIES
B. Mohi Estate, Gota Railway Over Bridge, Gota, Ahmedabad 382421, Gujarat, India.

Through the years, they have successfully served different industries such as Chemicals, Petrochemicals, Fertilizers, Power plants, Paper Ind., Refineries, Atomic Energy Plant, among others. Their system of functioning and quality is certified by various quality institutions including ISO 9001:2015 and API.

Under Himanshu's able leadership, Hina Industries promotes values of integrity, reliability, innovation and customer focus that has earned them an invaluable goodwill in the domestic and international markets. "We work hard and pursue first-rate quality and service, creating an enthusi-

astic, open, sincere, cooperative, pioneering and win-win atmosphere. Being a partner to our customers, we strive to produce creative and innovative valves through our wide sales network," says Himanshu.

Their product range includes all major pressure class valves like Ball Valves, Gate Valves, Globe Valves, Check Valves, Butterfly Valves, Flush Bottom Valve and Special Valves which are made from high quality cast carbon steel, alloy steel, stainless steel and super alloys material. All Hina industries products are specially made as per the quality requirements of the International Standards like ISO9001:2008, API6D, BS EN ISO 17226, ANSI B16.5, ANSI B16.10, ANSI B16.11, BS 6752 Part 1, API608, API607.

Their vast domestic dealer network coupled with the back up support they provide for their products has helped them make inroads everywhere.

Fostered with expert industry knowledge and a highly skilled team of professionals, their entire product range is tested on several quality parameters before hitting the market at very competitive prices. They follow the practice of "customer first" by investing in delivering quality products, on-time deliveries, service and value to customers.

"We endeavor to keep persevering on our traditional strengths and fulfill our vision of becoming a global player, destined to professionalize and excellence while striving for the highest levels of satisfaction for our customers.

With a vision to produce highly engineered, reliable, and quality valves, casting and allied products to the strict and exacting international specification, Hina Industries is all set to become one of India's leading manufacturer of industrial valves for the critical and demanding application," says Himanshu.

Water Treatment beyond borders

Varun Chokshi's V Aquacare India is serving the world with its water treatment plants and oxygen generator plant

V Aquacare India

Varun Chokshi founded V Aquacare India in 2013. Since then, the company has grown in leaps and bounds to include clients not just in India, but even Europe, Southeast Asia, East Asia, Middle East, South America, and Oceania, Africa and the Gulf.

V Aquacare specialises in manufacturing various types of reverse osmosis system, oxygen generator plant, effluent treatment plant, sewage treatment plant and water and wastewater management. Located in Ahmedabad, Gujarat, it has been in the industry for more than a decade and is fast becoming a supplier to world class brands. Continuous efforts in research and development and concentration on quality control has brought long-term and reliable orders from all over the world.

"V Aquacare has won huge fame in the domestic and overseas markets for its exclusive service and high quality. We can customize our machines according to different international standards. And we regularly upgrade our methods and services according to global requirements," says Varun.

The company is one of the leading effluent treatment plant exporters in India. The effluent treatment plant helps to remove contaminants from wastewater and industrial waste, as well as water used by industry, hospitals and hotels. Oil and grease, colorant, chemicals, metals, resins, and surfactants are pollutants commonly referred to as effluent. As a resource, effluent can be recycled for a variety of uses, such as chillers, cooling towers, gardening, and fishing toilets. The effluent treatment plant is a type of sewage treatment plant.

Next in line is the wastewater treatment plant. V Aquacare manufactures complete wastewater treatment plants and systems based on all the latest technology like SAFF, FBR, MBR, SBR technology and MBR for residential settlements, hospitals, hotels, cities. Using this technology they offer zero discharge/partial discharge and a full/partial recycling system. The sludge generated is quite low and overcomes the demerits of conventional systems.

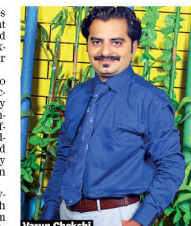

The company also manufactures Compact Sewage Treatment Plant Exporter Skid which can be installed easily without any civil labour except for equalisation tank and clear water.

Interestingly, V Aquacare is also an oxygen concentrator manufacturer with industry experience. They have professional technical members, advanced production lines, efficient management systems, considerate services, prompt delivery and competitive prices. With a capacity up to 300 M3 / Hr, it finds application in industry, hospital, fish pond, etc.

"We are also planning to give Oxygen generators to hospitals through our dealers or distributors. From next year, we aim to enter in govern-

ment tender for Oxygen generator and water treatment products," says Varun.

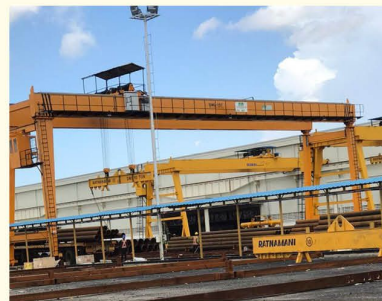

Speaking about how their skilled team contributes to V Aquacare's success, Varun adds, "Our employees and trainee staff are in line with our aspiration to reach a 100 Cr goal. They work hard and smart, and the management in turn gives them a free hand and goes out of its way to appreciate extraordinary work."

Lifting and shifting solutions- VGOR Engineers

V - Vigorous, G - Great Diligence, O - Optimum Design, R - Research & Development

A healthy relationship with customers is the foundation of every successful establishment, believes S Govrishankar and it is this belief that has led him to make a success of his company VGOR Engineers - A complete lifting and shifting solution provider. With more than 2 decades of experience in Finance, Accounts and HR in Engineering Industry, G Vasundhara, is proprietor of VGOR Engineers.

Founded in 2011, VGOR Engineers brings to fore a vast array of material handling solutions adept for various functions in different industry types. An ISO 9001:2015 Certified Company, it specialises in providing services for Industrial Cranes and Steel Plant Handling Equipments.

Their services include Design and Engineering Services, Solutions to Problems in Cranes, Maintenance Services, and Supply of Spare Parts and Crane Components. Prior to VGOR Engineers, Govrishankar, a mechanical engineer by profession, had been associated with pioneer organisations in the field of design and engineering, in India and abroad. His career span includes designing of advanced Cranes/Hoist systems, as well as heading various key positions in manufacture design of Crane/Hoist. He has designed and was instrumental in the execution of more than 1000 cranes and hoists, both manual and electrical, capacities ranging from 1 MT to 100 MT.

As the Founder and Chief Promoter of VGOR Engineers, S Govrishankar, first in his family to enter in to business, has ensured that the company is managed by professionals with robust experience in the field of material handling equipment industry. Their technical expertise of engineers and highly skilled technicians, brings a rich

legacy of breakthrough designs in the field of material handling.

In addition, VGOR Engineers boasts a state-of-the-art infrastructural set up which helps them manufacture a range of top quality equipment. It is divided into several units for designing, manufacturing, quality checking, and storing. Their wide assortment of machines include Lathe machine, Radial drilling machine, Hydraulic press for gear-pinion assembly, MIG Welding machines with magnet trolleys for welding box girders, Plasma Cutting Machine, Airless Spray Painting equipment and Load Testing facility.

These hi-tech machines enable VGOR to meet the bulk requirements of their clients, without compromising with the quality S Govrishankar states, "One will be hard pressed to find a product or price advantage again. Products can be easily duplicated, but a strong customer service culture can't be copied. We believe being on par in terms of price and quality only gets you into the game. Service wins the game. That is what we build and believe in."

Research and Development being a hallmark of their products, VGOR Engineers is proficient in understanding the clients' unique needs and challenging demands, and responds accordingly. They share their experiences in the field so as to help the customer understand their demands better. This determined effort of their team and the quest for excellence helps them to have an edge in the market.

Top quality, advanced manufacturing unit, dedicated workforce, timely delivery of equipment, and wide distribution network are the determining factors behind VGOR Engineers reliable reputation.

S Govrishankar

New Hope For Parenting

FLORA Fertility center is a dedicated organization of enthusiastic doctors team of Dr. Vandana Amin (A renowned gynecologist in the field since 1996), Dr. Pravin Patel (A senior Gynecologist), Dr. Varsha Patel and Dr. Mitsuru Trivedi.

FLORA promises to serve with perfect scientific approach to the problems related to fertility and recurrent pregnancy loss. The team is transparent, confident and enthusiastic.

Trailblazing the modern-age elevators and modernisations of old elevators

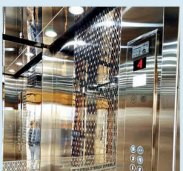

CG Purohit of Aegis Elevator shares how they plan to lead the market

Do you know that MNCs hold major market share in the Indian elevator segment? Not only are their products costly and high in maintenance cost, but they're also ill-suited to most Indian cities where power failure is a common occurrence.

However with the correct skill and effort, we can reverse the situation, feels CG Purohit, CEO of Aegis Elevator (AEPL). "At Aegis, we promise world-class, energy efficient, and environment friendly mobility solutions."

Based in Ahmedabad, Gujarat, Aegis Elevator was set up by a team of experienced technopreneurs to innovate safe and technically high class user friendly, low maintenance elevators.

The firm offers various superlative vertical mobility solutions such as VITA passenger elevator, CITO-MRL passenger elevator, FAZ Freight elevator, Hospital elevator, Hydraulic elevator and many more. It manufactures, installs and services high-performance elevators for the whole gamut of urban edifices

office, residential, commercial, healthcare, hospitality complexes and other buildings.

To sum it up, Aegis provides Total Elevator System Solution expertise. The reliability, durability, and performance of Aegis elevators depend on regular inspections, preventive maintenance and stringent safety check-ups conducted by the experts. These help reduce operation, repair and downtime costs, and ensure excellent user experiences across longer timeframes.

What sets Aegis apart from others is the preparatory phase that preceded the company's inception: an intensive know-how gestation period that lasted years - probably the industry's longest.

Even today, when hardly few companies provide consultation, Aegis promotes consultation and supports the customer to choose the right product, without any sales or target pressure. It prefers to lose an order rather than encourage wrong selling.

In an open market, Indian players have often failed due to lack of vision, the Ambassador and Flat cars being a case in point. But at Aegis, we have a highly experienced management team as well as a small R&D department to understand the customer's needs. We also have an excellent after service sales force to attend to customers punctually. So far, we have completed all installa-

Aegis Team

tions before time, and with the valid Government licenses," shares Purohit. Aegis strongly believes in value addition, whether it's relation quality service or business ethics.

During the recent lockdown, all Aegis elevators ran smoothly even without maintenance due to restricted movement, which speaks loudly about their reliability and quality.

By focusing on the problems caused by old and ageing elevators, Aegis also specialises in modernisation of old elevators using the latest technology in vertical mobility.

It has been transforming old and problematic elevators into new age elevators that come with stainless steel car, gear and gearless machine, rewiring, and top-cop touch. The latest technology also reduces the electricity bills by 40% to 70%, thus helping you to recover the renovation costs in a few years and thereafter saving on electricity bill for elevator. While new technology enhances the performance, the modern aesthetics enhances the look, thus transforming the entire lift from old to gold.

Dahison Automobiles - Green Fueling Gujarat

Dahison Automobiles in Ahmedabad is one of the leading businesses and pioneers in the Gas (CNG - Compressed Natural Gas) Conversion Kit Dealers, with expertise in CNG Conversion Kit Installation Services. Established in the year 1984 at Driev, In, Ahmedabad, Dahison Automobiles is a top player in the category of high-quality gas fuel kit conversion dealers in India. This well-known establishment acts as a one-stop destination serving customers both local and from other parts of Gujarat.

There are plethora of benefits of using a CNG Kit in a car. Firstly it makes one's car pollution less. CNG, as a fuel, is drastically less polluting than both, petrol and diesel, and it burns more efficiently as well. Getting CNG fitted in your car reduces your carbon footprint. It also makes your car cost less to run as CNG cars offer high fuel efficiency and low running costs. This makes your wallet a lot happier as your car will cost much less to fill up and run, nearly 65% saving.

Another benefit is that CNG saves you from adulterated fuels. Unlike petrol or diesel which can be easily adulterated, it is almost always impossible to adulterate CNG. Any kind of adulterated fuel is a potential risk to your car. Similarly, the very nature of CNG point of sale is such that traditional short changing scams which are extremely easy in petrol and diesel points of sale do not work on CNG sales, so you always get what you pay for. And finally it saves India's precious forex, since India imports most of the fossil fuels.

Over the course of its journey, this business has established a firm foothold in the automotive industry. They believe that customer satisfac-

Amit Upadhyay

tion is as important as their products and services. This has helped this establishment garner a vast base of customers, which continues to grow by the day.

This business employs individuals that are dedicated towards their respective roles and put in a lot of effort to achieve the common vision and larger goals of the company. With right kind of product, one's vehicle can not only drive efficiently but also there won't be any compromises over the performance of the vehicle. Certain measures are considered at Dahison. Soon, this business aims to expand its line of products and services and cater to a larger client base.

Dahison Automobiles offers a wide range of products and services to cater to the varied requirements of their customers. The staff are courteous and prompt at providing any assistance. They readily answer

any queries or questions that you may have.

Their CNG Conversion Kits are not only few of the safest and few of the most efficient but also are few of the most durable ones. They use the most advanced, highly accurate and generously efficient technology to reach the level beyond their customers' expectations. Their tons of customers, which they believe to be a part of the Dahison family, include owners from driving small and medium budget cars to premium luxury sedans, coupes and high-end, premium luxury SUVs. Their customers are extremely satisfied with their installed CNG Kits.

Other services offered by Dahison Automobiles are CNG, hydrogen cylinder testing services, car engine and gearbox repairing and rebuilding services, premium detailing services, accidental body repair services, and much more.
